

☒ Publish Cobertura Coverage Report

Cobertura xml report pattern

This is a file name pattern that can be used to locate the cobertura xml report files (for example with Maven2 use ****/target/site/cobertura/coverage.xml**). The path is relative to the module root unless you have configured your SCM with multiple modules, in which case it is relative to the workspace root. Note that the module root is SCM-specific, and may not be the same as the workspace root. Cobertura must be configured to generate XML reports for this plugin to function.

Consider only stable builds ☐

Include only stable builds, i.e. exclude unstable and failed ones.

Coverage Metric Targets

Conditionals			<input type="text" value="98"/>		<input type="text" value="75"/>		<input type="text" value="75"/>
Lines	Delete		<input type="text" value="98"/>		<input type="text" value="75"/>		<input type="text" value="75"/>
Methods	Delete		<input type="text" value="100"/>		<input type="text" value="80"/>		<input type="text" value="80"/>
Packages	Delete		<input type="text" value="100"/>		<input type="text" value="95"/>		<input type="text" value="95"/>
Add							

Configure health reporting thresholds.

For the  row, leave blank to use the default value (i.e. 80).

For the  and  rows, leave blank to use the default values (i.e. 0).
