Build

Invoke Gradle script

Gradle Version	Gradle-0.9RC2
Build step description	
Switches	
Tasks	test uploadArchives
Root Build script	
Build File	

Specify Gradle build file to run. Also, some environment variables are available to the build script

Add build step ▼

Delete

Post-build Actions

☐ Publish Javadoc

☐ Archive the artifacts

☐ Aggregate downstream test results

☑ Publish JUnit test result report

Test report XMLs: `**/build/test-results/*.xml`

⊖ '**/build/test-results/*.xml' doesn't match anything: '**' exists but not '**/build/test-results/*.xml'

Fileset 'includes' setting that specifies the generated raw XML report files, such as 'myproject/target/test-reports/*.xml'. Basedir of the fileset is the workspace root.

☐ Retain long standard output/error
