Manage Hudson

Configure System
Configure global settings and paths.

Configure Executors
Configure resources available for executing jobs.

Reload Configuration from Disk
Discard all the loaded data in memory and reload everything from file system. Useful when you modified config files directly on disk.

Manage Plugins
Add, remove, disable or enable plugins that can extend the functionality of Hudson.

System Information
Displays various environmental information to assist trouble-shooting.

System Log
System log captures output from `java.util.logging` output related to Hudson.

Script Console
Executes arbitrary script for administration/trouble-shooting/diagnostics.

Prepare for Shutdown
Stops executing new builds, so that the system can be eventually shut down safely.

Hudson ver. 1.223

Done
