			0.3
Archive and publish .NET code coverage HTML reports from **NCover**.			
☐	**NUnit Plugin**		0.10
	This plugin allows you to publish **NUnit** test results.		
☑	**Performance Plugin**		1.2
	This plugin allows you to capture reports from **JMeter** and **JUnit** . Hudson will generate graphic charts with the trend report of performance and robustness. It includes the feature of setting the final build status as good, unstable or failed, based on the reported error percentage.		
☐	**PerfPublisher Plugin**		7.97
	This plugin generates global and trend reports for tests results analysis. Based on an open XML tests results format, the plugin parses the generated files and publish statistics, reports and analysis on the current health of the project.
